

## Control Your Habitat Screen™ with Your Phone

The Somfy® TaHoma™ allows you to use your smart phone to control your Habitat Screen™ even when away from home. The TaHoma allows for full control of your Habitat Screen™ and includes individual control, group control, remote access and a 7-day schedule.

### Do more with the services you love!

The Somfy TaHoma™ allows you to enjoy your Radio Technology Somfy® (RTS) motorized solutions even more with IFTTT (If This, Then That) technology.

IFTTT is a free, web-based service that allows myLink to communicate with other smart home solutions easily.

Now, your connected devices and apps work together to create the ultimate ambiance, automatically.

Get started immediately with Applets by Somfy, or create your own, to maximize your experience based on conditions.

IF your connected thermostat reaches 90 degrees, THEN your RTS shades will automatically lower to reduce energy.

IF your connected lights dim after 9pm, THEN your bedroom shades lower for privacy!

### Voice commands

Use natural voice commands to operate your RTS connected products.

### App control

Harness the power of your favorite mobile device for Somfy-powered solutions.

### Remote access

Activate Somfy-powered solutions even when you're away from home to maximize the many lifestyle benefits they provide such as energy savings, UV protection and privacy.

### Timed events

Schedule motorized applications based on time of day or sunrise/sunset times.

### On-screen setup wizard

Intuitive installation and setup allows you to enjoy your myLink experience in a few short minutes.

### Flexible

Choose the best way to control up to 16 channels of motorized solutions with options such as individual control, group control, and more.

### Compatible

Controls all Radio Technology Somfy® (RTS) products including motorized blinds, shades, curtains, screens, awnings, and rolling shutters as well as RTS enabled lighting devices. The myLink also works with third-party automation systems, Amazon Alexa and Google Assistant via IFTTT.
